

SLBG-A

DKKOL SLBG-A_TDS_V2-2/11/2017 * Allergene list 07/12/2015

Food grade grease for slide rails and most bearings

The Frontmatec SLBG-A is a food grade NSF-H1 registered, high-quality, adhering, slide rails and bearing grease for NON-high speed roller and plain bearings. Specially formulated for slide rails and low speed bearings and profiles below anchor chains and scalding vat chains.

The Frontmatec SLBG-A is a grease with superior lubricating properties, extremely high water resistance properties and excellent adherent abilities. Therefore, this SLBG-A grease provides great protection against wear and corrosion. The SLBG-A is formulated to refrain from dripping down or be washed out, as many other traditional greases often can be.

Specifications

Chemical composition	Synthetic oils, anorganic thickener, active substances. All NSF-H1 registered.
NSF H1 Reg. number	149760
Resistance to water	0-90 DIN 51 807 T1
Appearance	Brown
Operating temperature	-15°C to +130°C/+5°F to +266°F
Walk penetration	Approx. 300 1/10 mm DIN ISO 2137
Dropping point	>+200°C/392°F DIN ISO 2176
Oil separation	K < 0.5 DIN 51 817
Package	400 g cartridges (with 25 pcs/case) 18 kg or 50 kg container 0.88 lb cartridges (with 25 pcs/case) 40 lb or 110 lb container

Technical changes are subject to alterations!
