

Lairage design

Stress-reducing environment

When designing the lairage, Frontmatec aims to design a stress reducing environment, from arrival to the stunning of the pigs, and to create an area for groupwise handling of the pigs.

Having Frontmatec design the lairage, you are ensured operational efficiency and improved meat quality through the highest level of animal welfare.

Lairage equipment

- Push/hoist gate
- Pneumatically driven hoist gate
- Dividing gate
- Swing gate

Animal welfare

- Veterinarian inspection in resting area
- Reduced biting due to small groups of animals
- Drinking water system

Options

- Fully automatic: Both lairage and runway are equipped with automatic gates
- Semi-automatic: Lairage is manual and runway is equipped with automatic gates
- Manual: All operations in the lairage area are manual with hinged gates

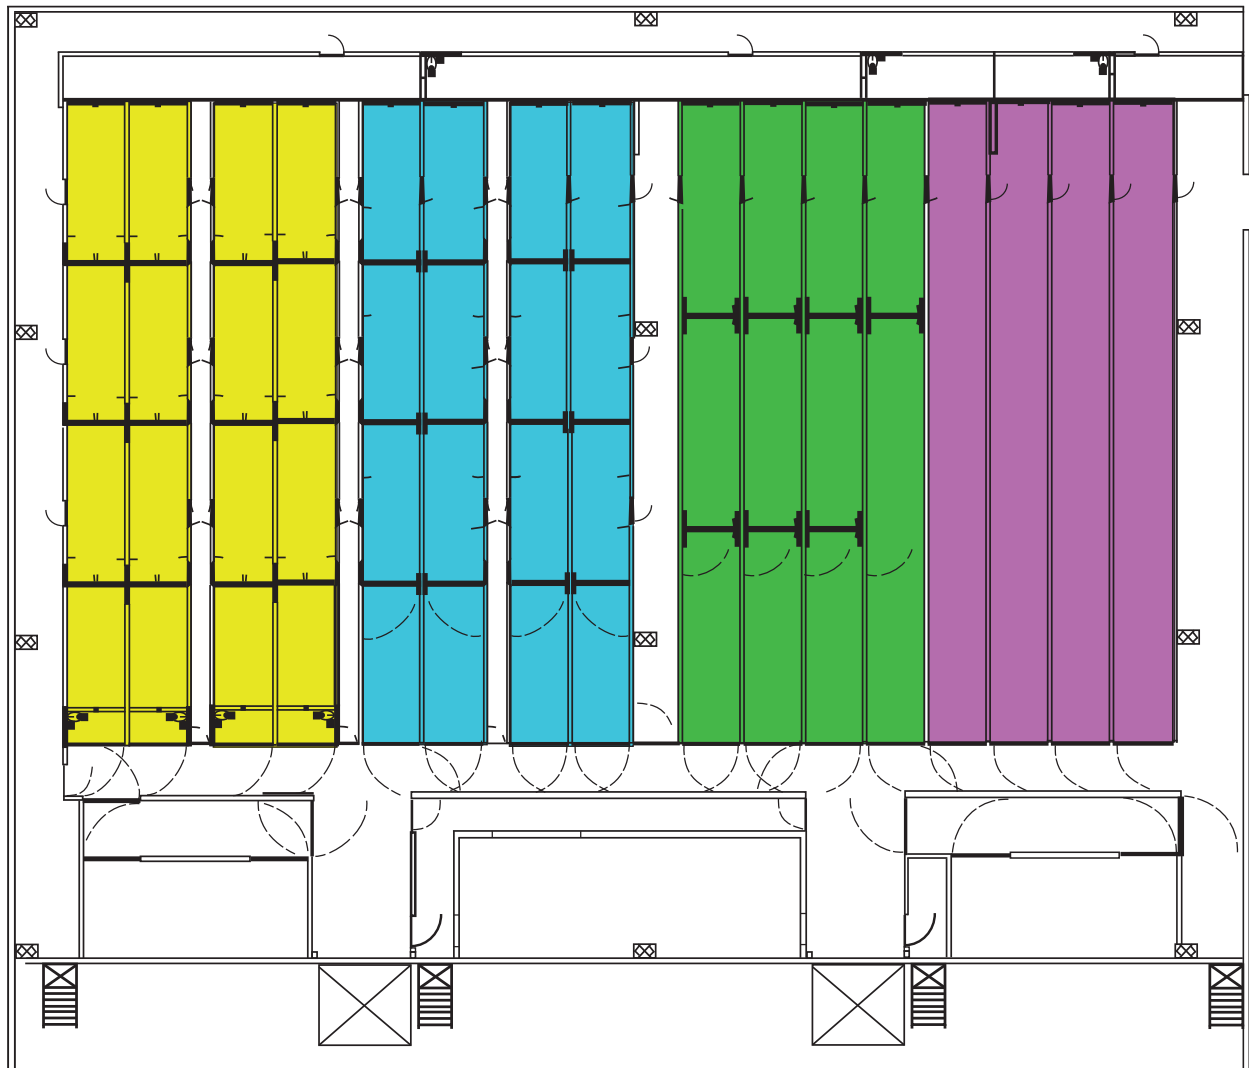

Why the Frontmatec lairage design!

- Cost benefits due to minimum manual handling of pigs in automated or semi-automated solutions
- Reduced labour requirements
- High level of animal welfare and stress-free pigs in the stunning area secures high meat quality
- Reduced noise level improves working conditions for the lairage operators
- Improved inspection conditions

Safety and legal requirements

The Frontmatec lairage design is CE approved and designed to meet the strictest demand on health and safety.

- Fully automatic: Lairage is equipped with automatic gates and push/hoist gates
- Manual: All operations in the lairage area are manual with hinged gates
- Semi-automatic: Lairage is manual and equipped with moveable dividing gates
- Manual: Without holding pens
