

How to keep **uniform products** on your automatic cutting line for pork middles

Achieve yield improvement by having your certified Frontmatec service specialists perform the individual bar-adjustments in the infeed arrangement, that is essential for accurate fixation of the spine and for further measuring and processing of the pork middles.

Have a smooth operation and achieve best price for meat by ensuring that the AMBL keep performing precise and clean cuts. Your experienced Frontmatec technicians verify the condition and the tension of the gripper chain, and function of the air cylinders together with an exact alignment of the knives.

Stay prepared for the unexpected by having a renovation solution for the gripper chain and stocking the most used spare parts such as knives, air cylinders, gears and motors.
